

RESILIENCE IN EVERY HARVEST: HOW ::: GORE BALTO BEAT THE DROUGHT :::

After years of losing his livestock to devastating droughts, Gore Balto transformed his family's future by embracing climate-resilient farming. Through access to clean water and the introduction of haricot beans, he now has a reliable way to feed his family and keep his cattle healthy during dry spells. This shift from survival to stability has improved his household nutrition and created income, ensuring his children no longer face the hardship of the past.
